

Artificial Intelligence

Fiona Yan Liu

Department of Computing

The Hong Kong Polytechnic University

Learning Outcomes of Lecture 08

- Understand the concept of uncertainty
- Understand rationale of Bayesian Theorem
- Master Bayes' Rule
- Master causal Inference
- Master diagnostic Inference

Syllabus

- What is artificial intelligence?
- How to find a solution for a given problem?
- How to find a solution with constraint?
- How to find a solution for more than one intelligent agent?
- How to find a solution by summarizing all available information?
- How to build knowledge base by learning?
- How to solve the problem by learning?
- Human-like judgement by human-like information processing
- How to find the cause behind the fact?

Final Exam

■ General information

- ❑ Fri. May. 8 19:00 – 21:00
- ❑ SH1 - Main Hall of Shaw Sports Complex
- ❑ Close book
- ❑ Non-programable calculator is allowed

■ Coverage of the paper

- ❑ Cover all the content has been discussed in the lectures (Lecture 1 - 9)
- ❑ Except for mathematical proof and labs

■ Form of questions

- ❑ Multiple choice 20%
- ❑ Answer the questions 80%
 - Understanding of the concepts and techniques
 - Illustration or comparison using examples
 - Calculation

Preparation of the Final Exam

- Prepare for the final exam
 - Learning outcomes is very helpful
 - Quiz answer will be uploaded for your review by tomorrow
- Office hour
 - Office hour for Final Exam I
 - QT419 505
 - Wed. May 6 15:30 – 17:30
 - Office hour for Final Exam II
 - PQ 703
 - Thur. May. 7 15:30 – 17:30
 - Office hour for Final Exam III
 - PQ PQ703
 - Fri. May. 8 15:30 – 17:30
 - Or make appointment with me via email: yan.liu@polyu.edu.hk

SFQ and Makeup Quiz

- SFQ
 - ❑ COMP4431
 - ❑ Artificial intelligence
 - ❑ LIU Yan
- Makeup quiz
